

Assignment 01 Marking Rubric

Overall Grading Scale

	Description			
• Exceptional code quality across all questions with consistent style and thorough documentation	• Good code quality with consistent style and adequate documentation	• Acceptable code quality with some inconsistencies in style or documentation	• Poor code quality with many inconsistencies	• Very poor code quality or incomplete implementation
Excellent	Well done	Very good	OK	Need to review
HD	D	C	P	F

Task 1: Character census

	Description			
All five counts correct across varied inputs; character-by-character scan correctly implemented; self-check (four categories sum to total) present and passes; clearly labelled report	All five counts correct with only minor issues; scanning correct; self-check present; report adequately labelled; readable code with some comments	Most counts correct but some edge cases misclassified; basic report; self-check missing or partial; acceptable structure, minimal comments	Some counts attempted with noticeable errors; categories misclassified; poor or unlabelled output; weak code structure	No meaningful attempt or code does not run; counts incorrect throughout; no self-check
Excellent	Well done	Very good	OK	Need to review
HD	D	C	P	F

Task 2: Case and vowel breakdown

	Description			
Uppercase/lowercase, vowel/consonant, and per-vowel frequency counts all correct; vowels handled case-insensitively; cleanly integrated into the report	Most counts correct with minor errors; per-vowel counts mostly correct; good structure and comments	Some counts correct but case-insensitivity or consonant logic partly wrong; basic per-vowel handling; acceptable structure	Significant errors; vowel/consonant classification flawed; per-vowel counts largely missing or wrong; poor output	No meaningful attempt or incorrect logic throughout
Excellent	Well done	Very good	OK	Need to review
HD	D	C	P	F

Task 3: Word statistics

	Description			
Word boundaries correctly implemented without str.split(); total words, longest word and length correct; average rounded to 1 d.p	Word detection mostly correct; longest word and average correct with minor issues; good structure and comments	Basic word counting works, but edge cases mishandled; average not rounded correctly; acceptable structure	Word-boundary logic flawed causing significant miscounts; longest/average unreliable; poor formatting	No meaningful attempt or code does not run
Excellent	Well done	Very good	OK	Need to review
HD	D	C	P	F

Task 4: Line and sentence analysis

	Description			
All three measurements correct; line counting handles newlines correctly; sentence terminators counted accurately; longest-line length exact	Mostly correct with only minor errors; good structure and comments	Some measurements correct but line count off-by-one or sentence terminators partly miscounted; basic longest-line logic; acceptable structure	Significant errors across measurements; poor output formatting; weak structure	No meaningful attempt or code does not run
Excellent	Well done	Very good	OK	Need to review
HD	D	C	P	F
